

# The Original, Proven **RLS** HVAC/R Press Fittings Compared to Modified Plumbing Fittings.

## RLS HVAC/R Press Fitting

**FLARE** on end (HVAC/R style)

Two complete 360° circular metal-to-metal connections.

- Maintains circular tube shape
- Proven since 2015
- Made in USA
- RLS witness mark for press confirmation

## ZoomLock® Max/Conex MaxiPro

**NO FLARE** on end (plumbing style)

Hexagonal press leaves 6 points with no jaw contact.

- Disrupts circular tube shape
- Introduced after June of 2019
- Imported
- No method of press confirmation

## RLS looks different, because it IS different!

When it comes to press-to-connect fittings for high-pressure HVAC/R applications, you can choose the original RLS press fittings (sold under the ZoomLock brand from 2015-2019) which were specifically designed and engineered for HVAC/R and have been used successfully around the world for more than 8 years. Or, you can choose imported, modified plumbing fittings which may get confused with actual plumbing fittings on the jobsite. Don't put yourself and your reputation at risk. Choose the American-made fittings with a proven track record – RLS!

Look for the flare!

That's how you know it's for HVAC/R.
