RLS press fittings and seals are compatible with the above refrigerants. Refrigerant compliance varies by region and/or jurisdiction, so consult your local codes and standards to ensure RLS press fittings are compliant with your fluid. Refer to our chart at [rapidlockingsystem.com/resources/approved-refrigerants](http://rapidlockingsystem.com/resources/approved-refrigerants) for the most up-to-date list.

\*Special order item. Chlorinated fluid requires a Neoprene seal (o-ring) in place of HNBR. Minimal product offering available. RLS fittings are also compatible with the following industrial (non-refrigerant) gasses: nitrogen, argon, helium and oxygen (non-medical).
